

Ending Homelessness Through

HOUSING • OUTREACH • AWARENESS

Through HomeAid's 19 chapters spanning from **Hawaii to the Atlantic**, we have developed strategic partnerships with over **350 nonprofit organizations nationwide** effectively ending homelessness. As a result, HomeAid has completed a total of over 1,000 developments including emergency shelters, transitional housing, permanent supportive and affordable housing, and critically needed resource centers.

In 2020, **43 developments were completed** which included several tiny home projects, housing for victims of sex trafficking, foster youth, pregnant minors and their children, veterans, families, and those suffering from developmental disabilities, addictions or medical conditions.

Projects valuing over **\$5 million in construction** costs have been significantly reduced to a **50% cost** savings as a result of the generosity of HomeAid's builder captains, trade partners, consultants, and suppliers **saving nearly \$2.5 million**.

Everyone deserves a place to call home.

COVID-19 PANDEMIC & HOMELESSNESS

The pandemic has been a major disrupter of homeless system operations. The 2021 Point-in-Time Count will necessarily proceed differently than it has in previous years. HUD released new guidance allowing for new flexibilities in counting unsheltered people. The accuracy of this count is imperative to the ability to address the homelessness crisis that has increased amid the COVID-19 health crisis.

THE NEED
for HomeAid is Paramount

Systems are **Overwhelmed and Strained**

People experiencing homelessness who are infected by COVID-19 are **TWO TO THREE TIMES MORE LIKELY TO DIE THAN THE GENERAL POPULATION.**

—National Law Center on Homelessness and Poverty
